The Eastern Cape Development Cooperation (ECDC) donated equipment to two Co-operatives in EmaXesibeni

Ngu Khanya Kalashe

On the 21st of September 2023, the Eastern Cape Department of Economic Development, Environmental Affairs and Tourism, MEC Mlungisi Mvoko and Umzimvubu Mayor, Cllr Zukiswa Ndevu visited Ndzongiseni Village in Ward-05, EmaXesibeni.

The visit comes after two women led co-operatives in the area were supported with tools of trade. These include a water tank and a tractor valued at R1 million rand. The visit was to further encourage more co-operatives in the area to explore agricultural opportunities and investment.

The MECs visit to this area demonstrates the department's commitment of supporting local enterprises and initiatives that contribute to economic growth and the empowerment of women. The two co-operatives namely Nzokuhle Poultry Primary Co-operative Ltd and Sanelisiwe Agricultural Primary Cooperative are based at Ndzongiseni at EmaXesibeni (Umzimvubu Local Municipality) and are sharing the same water source and the road to their fields. Together they own above 30 hectares, situated on the banks of perennial Mzintlava river. Due to growing vandalism in the area, the two Co-operatives have agreed to use alternative safe means to source water by using a constructed water reservoir instead of tanks that are easily stolen. The Co-operatives are both family owned respectively and producing fresh produce for local, formal and informal markets.

According to Mr. Mlungisi Mvoko, the MEC for Economic Development, Environmental Affairs, and Tourism, they donated R1,100,000 to both cooperatives, with R600,000 going to the Nzokuhle co-operative for a tractor and accessories and R500,000.00 for a water reservoir fence and inputs. "We are here today because of these two Cooperatives that made applications to the Eastern Cape Development Corporation (ECDC) for assistance which is why we urge people to also apply to ECDC so that such donations will be possible, concluded Mr Mvoko.

"The promotion of entrepreneurship, innovation, enterprise growth and competitiveness is critical in growing the economy and creating jobs. What we did here today proves to be a significant achievement because it reflects a positive trajectory in terms of implementing the local economic development strategy", concluded Cllr Ndevu.

TOLENI SENIOR SECONDARY SCHOOL RECIEVED UNLIMITED WI-FI

Toleni Senior Secondary School (SSS) is one of the first schools within Umzimvubu Local Municipality to have access to unlimited internet connection.

Toleni SSS is based in KwaShushu village around Dangwana under KwaBhaca. It is also a new school that opened few years ago.

Honourable Mayor Cllr. ZukiswaNdevu accompanied by her Executive Members went to hand over the wi-fi infrastructure that costed R1,5 million.

She encouraged all learners to effectively use the Wi-Fi for educational purposes and not to browse through pornography, dating apps and video games.

By reminding the learners on how useful the internet is the mayor also reminded grade 12 learners that exams will begin on the 30th of October 2023

The principal of the school, Mr Dumisani Mtwesi showed how grateful he is with the government plan and promises a significant increase of the grade 12 pass rate.

He said "The matric class average is gradually improving. Our matric class first achieved an average of 70% in the beginning of this year, thus improving by 8% during the second term resulting to 78%. It's pleasing to note that they have since attained 82% in hope of receiving 97% or more in the final term".

"We had a challenge in 2020 when our pass rate was only at 70%, but we certainly hope for much improved results.", concluded Mr Mtwesi

The District Director from the Department of Education, Mr MonwabisiMbangeni said he is honoured to see such commitment from a new school. Since the establishment of the school, we have witnessed a significant growth in numbers.

He said top achieving schools will also receive uniforms and laptops in the upcoming years to encourage students with the technology upgrade that will help them have more knowledge about the internet and job application.

The 4IR global development has assumed space in most commercial and public sector markets, that is why all learners should be exposed to the usage of technology and explore online opportunities.

A learner at the school, Zukiswa Majima, 17 said, "It is an honour for us to receive much improved Wi-Fi infrastructure development in the school because it was hard to get previous examination papers but now it will be much easier to gain access to it through this development" concluded an excited Majima.

The free to access WI-FI connection covers a 100-metre radius throughout the Toleni Village and will be regularly monitored by the Municipality.
