TERMS OF REFERENCE

FOR THE

PROVISION OF PRODUCTION INPUTS OF SANITIZERS (KWA-BHACA)

REF: ULM/19/2020/LED/008

1. Introduction:

The importance of hand sanitizer to everyone at this period of coronavirus pandemic cannot be overemphasized.

When it comes to protective measures against the deadly coronavirus infections, the use of hand sanitizer is as effective as hand washing. This is why the Centers for Disease Prevention and Control (CDC) and World Health Organization (WHO) recommended its use when soap and water are not available.

Water and soap may not always be there for you to use when the need arises but a sanitizer can be as it is small and easy to carry when going outside your home.

It can take at least 60 seconds, and sometimes longer, for alcohol-based hand sanitizer to kill coronavirus if used correctly but even in donkey years will not be effective against the norovirus, rotavirus, cryptosporidium and clostridium difficile.

2. Request:

- Umzimvubu Local Municipality is therefore requesting the services of a service provider to supply, deliver and distribute production inputs for the SMME's producing bulk levels of sanitizers.

Scope and Extent of work: To supply, deliver and distribute production inputs for the SMME's producing bulk levels of sanitizers and utensils.
